PURE WHITE ZINC PAINT.—Manufactured from the Vieille Montagne Company's white oxide of zinc; perfectly free from all poisonous qualities, is unaffected by sea water, sulphuretted hydrogen, or any of the gases, and preserves its original colour where white-lead paint will not. Also Grey Zinc Paint, strongly recommended for iron-work.—Sold wholesale by JOHN WARNER and SONS, 8, Cre ent, Jewin-street, London.

PURE PATENT WHITE ZINC PAINT, from the Vieille Montagne Zinc Mining Company.—The Company having become Proprietors of all rights and patents of the late Patent White Zinc Company, the Public is cautioned against being imposed on by parties who, having formerly been employed by the Company, have commenced the manufacture of Zinc White, and are now offering an article under the name of White Zinc Paint, which is represented to be the same as that prepared by the Company, but which, from inexperience in the manufacture, is found to be quite unfit for use. The Company's Paint is prepared from the ore of zinc, which is smelted in Belgium, and is manufactured by them in this country. It is entirely free from all poisonous ingredients, and is unaffected by sea water, sulphuretted hydrogen, or any gases; besides, it preserves its original colour, which White Lead Paint does not. White Zinc Paint causes none of those ravages, invariably engendered by white lead upon the human frame; neither painters' colic nor paralysis &c. &c., from which dangerous complaints the workmen, who manufacture and use it, are subject, and to which persons who inhabit newly painted apartments are also liable. A specious article having been introduced in the market, under the name of White Zinc Paint, the public is cautioned against it, because, when adulterated, it becomes a very inferior paint, instead of a first-rate one.—For further particulars and testimonials apply to Mr. F. P. SCHMOLL, General Agent for England and Scotland, at the Company's offices, 13, Manchester buildings, Westminster, Liverpool, and for supply of materials and prices, at Messrs. CHAP. DEVAUX and Co.'s, 68, King William-street, City.

HUBBUCK'S PATENT WHITE ZINC PAINT.—This elegant white, the favourite pigment of the ancients, has been used by artists through successive generations, and is still known to the members of the Royal Academy under the old name of Permanent White. Modern decorators could rarely afford this expensive article even for the delicate tracery of their most costly works.

Three years since the proprietors placed their manufacture on a large scale, and offered it at a price to compete with White Lead paint.

The successful introduction of this paint, and its confirmed superiority over every other paint hitherto known, brought forward various imitations.

These inferior productions, frequently made from arsenic, contain sulphur, lead, arsenic, and other deleterious materials, make injurious to health, deficient in body, and reducing the preservative properties for which the original paint stands pre-eminent.

In justice to the proprietors these should not be confounded with the original, even though sold under the pretence that it is all the same.

HUBBUCK'S paint is entirely free from any ingredient prejudicial whatever, it is healthful in the manufacture, healthful in use, and healthful to occupants of rooms newly painted with it.

As a guard to the painter against the substitution of the inferior paints, each cask is stamped

"HUBBUCK, LONDON PATENT,"

and if the cask has not been born on market, the price is obvious.

Circulars with full particulars may be had of THOMAS HUBBUCK and SON, Colour Manufacturers, opposite the London Docks.
